

# Calculating Density

## Density Formula

density

mass

$$\rho = \frac{m}{v}$$

volume

*density* = mass ÷ volume

*mass* = density × volume

*volume* = mass ÷ density

# Solving with the Density Equation

## Density

Denoted by the Greek letter *rho* ( $\rho$ )

Density describes the **mass** ( $m$ ) present within a specified **volume** ( $V$ )

Density

$$D = \frac{m}{V}$$

Mass from Density

$$m = D \cdot V$$

Volume from Density

$$V = \frac{m}{D}$$
